

# The Safe Working Programme

## *How effective is your Health & Safety System? ...But can you **prove** it?*

There's no better proof that your Team understand something than by asking them to **show** you what they know.

Fire drills check that your Team know what to do in a fire situation, but when was the last time you tested what they remember about the rest of your Health and Safety procedures? Especially when this knowledge could avoid accidents and save lives...

## *What is the Safe Working Programme?*

The c4mbd Safe Working Programme is a structured 4 week programme of learning and familiarisation of your health and safety procedures. This is based on Nationally Recognised Standards incorporated into our unique Safe Working Manual. Your Teams work leads to a Nationally Recognised Level 3 Qualification to show the outside World your commitment to a Safe workplace.

## *I already have adequate Health & Safety systems in place...*

### *Why do I need the Safe Working Programme?*

Health & Safety is about keeping people safe. But we are all too aware that things can and do go wrong.

- ? If they did how would you deal with the inevitable inquiry?
- ? How would you prove that your Health & Safety training was good enough?
- ? How could you prove that not only did you have the correct systems in place, but that your Team could demonstrate their knowledge and understanding of their own and the organisation's responsibilities – that they, and you, could prove what had to be done in an emergency situation?

## *This is what the Safe Working Programme is about.*

It uses your existing systems and works with your own Health & Safety Officers to **prove** that everyone in the organisation knows what to do and what not to do to stay safe at work. It encourages your Team to ask the right questions about Health & Safety, to fully engage in the process of staying safe.

- Your stakeholders will love the fact that you take Health & Safety at work seriously.
- Your customers will be impressed that your Team have Level 3 National Qualifications.
- Your insurers will appreciate your drive to reduce claims and risks.
- Visitors to your business cannot fail to be impressed that every member of your Team has their own Safe Working Manual to professionally guide them through the safety procedures of being on your premises.

## How the Safe Working Programme ticks the right boxes...

---

- The Safe Working Programme is based on **competence**
  - The Programme is **focused** only on the things that matter in your business
  - This development is **active** - not passive. Your Team really **engage** in Health & Safety
  - It raises Health & Safety consciousness in the business
  - The Professional Safe Working Manual is a portable, personal store of safety **documentation and certificates**.  
Every member of your Team has their own to refer to when they need to or when they move around your business to different managers or sections
  - It lowers the drama of **Health & Safety compliance** and training, but increases the effectiveness
  - Ideal for accompanying your own Health & Safety **induction** – especially for new Team members
- 

## *What next?*

To find out how this programme can be used within your organisation just give us a call. There is no pressure, and absolutely no obligation.

If you have even a small amount of curiosity about the Programme, feel free to call or email Robin, Dan or Phil to find out more, ask questions and to arrange an exploratory conversation.
